THE NEW MOKKA X

A GRIPPING ADVENTURE.

Xtra height. Xtra traction. That Xtra feelgood factor of driving high and mighty above the crowd. On the motorway, downtown or off-road, new Mokka X stays confidently on track.

And, when the going gets tough, Mokka X has the Xtra muscle: an intelligent four-wheel drive system for improved stability, traction and handling. Ideal when you're faced with the worst the British weather can throw at you.

Clever 4X4 technology uses sensors to continuously monitor Mokka X's attitude to road conditions. As the road surface changes, the four-wheel drive system automatically distributes drive between the front and rear wheels to optimise road grip.

And the high-tech doesn't end there.

With the Descent Control System you can take your Mokka 4X4 off-road and safely control your speed on steep downhill gradients without having to brake.

Gripping stuff indeed – on every level.

The vehicles illustrated in this brochure may not necessarily represent the correct final UK specification and not all the features or options described are available on every model.
