ON-THE-ROAD PRICES

To eliminate uncertainty about hidden costs when buying a new car, Vauxhall publishes on-the-road recommended retail prices (RRP) and these are shown in the pricing tables within this price guide. These prices include the recommended cost of number plates and delivery to a Vauxhall retailer of £645.00 (including £84.13 VAT), 12 months' Government Vehicle Excise Duty (see opposite for details) and the DVLA new vehicle first registration fee of £55.00*.

Please note: The on-the-road recommended retail price (RRP) does not include fuel supplied by the retailer, motor insurance or any other goods or services supplied by agreement between the retailer and the customer.

PRICE PROTECTION

Order a new Vauxhall for build in the current model year (as confirmed by your retailer) for delivery no more than three months in advance and the price you are quoted is the price you pay. This is irrespective of any subsequent price rises between placing your order and delivery of your new car, but you must take delivery as soon as the car is available. General Motors UK Limited is not liable for price adjustments caused by Government changes in the rate of VAT (currently 15%), Vehicle Excise Duty, DVLA new vehicle first registration fee or by any other applicable legislation or regulations.

VAUXHALL INTERNET PRICE (VIP)

All Vauxhall cars have a special Vauxhall internet price (VIP) as well as the on-the-road recommended retail price (RRP). See www.vauxhall.co.uk for details. It is Vauxhall's understanding that company car taxation will continue to be based on the on-the-road recommended retail price (RRP).

VEHICLE EXCISE DUTY

The amount of Vehicle Excise Duty (road fund licence) payable on new cars varies depending on the level of carbon dioxide (CO₂) emissions produced by the vehicle. CO₂ emissions are measured in grammes (g) per kilometre (km) travelled and divided into 13 charging bands shown in the table below.

Vehicle Excise Duty*

	CO ₂ emissions	Petro/Diesel
Band A	up to 100g/km	£0.00
Band B	101-110g/km	£35.00
Band C	111-120g/km	£35.00
Band D	121-130g/km	£120.00
Band E	131-140g/km	£120.00
Band F	141-150g/km	£125.00
Band G	151-165g/km	£150.00
Band H	166-175g/km	£175.00
Band I	176-185g/km	£175.00

PROTECTING THE ENVIRONMENT

Vauxhall has always been at the forefront of environmental issues and our products are increasingly winning green automotive awards.

However, our commitment to preserving the environment goes even further. We have reduced manufacturing emissions and our new vehicles use more recycled materials in their construction and more recyclable parts than ever before.

Looking further into the future we are working on cleaner, alternative power sources, including zero-emission fuel cell technology.

FOR MORE INFORMATION

For information on Vauxhall's efforts to achieve an environmentally sustainable future, including information on Design for Recycling, take-back of End-of-Life Vehicles (ELVs), and the recycling of ELVs, see www.vauxhall.co.uk/recycling

£2000 GOVERNMENT SCRAPPAGE ALLOWANCE

Further proof of our long-term commitment to the environment comes in our support for the government's £2000 Scrappage Allowance. Buy a new Vauxhall vehicle from a participating Vauxhall Retailer and we'll offer you £2000 to take your old, higher emission car or van off the road. At the time of ordering your new Vauxhall, your trade-in vehicle must meet the following criteria:

- You must have owned the vehicle for at least one year.
- It must have been registered in the UK before 31 August 1999 (ie. registrations up to and including 'T').
- Has a current tax disc and a current MOT certificate OR has a current tax disc and a current Hackney Carriage Licence OR has a MOT certificate that has expired no earlier than 14 days before the date of the new vehicle order.

Further terms and conditions apply so please consult your retailer for details or refer to www.vauxhall.co.uk

SMARTER DRIVING TIPS

- Drive at an appropriate speed: - Staying within the speed limit increases driver safety, reduces CO₂ emissions and saves fuel. At 70mph you could be using up to 9% more fuel than at 60mph and up to 15% more fuel than at 50mph
- Drive smoothly at all times: - Anticipate the ebb and flow of the traffic to avoid harsh acceleration and braking
- Reduce your revs: - Change gear earlier to help reduce fuel consumption - try 2500rpm with petrol engines and 2000rpm with diesel
- Idling is wasting fuel: - If you're likely to be at a standstill for more than three minutes, switch off the engine to save fuel
- Regularly check your tyre pressures: - Under inflated tyres increase CO₂ emissions whilst incorrectly inflated tyres can be unsafe. Always check your handbook for the correct tyre pressure. This will also help to increase the life of your tyres
- Remove unnecessary items from the car: - Extra weight increases the engine's workload, whilst roof racks and bike carriers increase wind resistance. All burn more fuel and increase CO₂ emissions

VAUXHALL SUPPORTING

BENEFIT IN KIND COMPANY CAR TAXATION**

The car benefit charge will be the car's list price (including VAT, options and accessories fitted, delivery to retailer and number plates, but excluding Vehicle Excise Duty and new vehicle first registration fee) multiplied by the percentage charge for the CO₂ emissions band in which the car falls (see table opposite). Multiply this figure by your personal income tax rate (20% for Basic Rate, 40% for Higher Rate for 2009-10 tax year) to calculate your annual benefit in kind tax liability.

The fuel consumption figures shown comply with EC directive 1999/100 to provide a realistic indication of fuel consumption by taking into account everyday driving conditions, such as cold starts, acceleration and braking. These figures take account of the vehicle's kerbweight, ascertained in accordance with the above regulation. **Important:** the results given relate to the particular vehicle tested. Variations in trim level and equipment may result in slightly higher fuel consumption and CO₂ emission levels than those quoted. Driving style, road and traffic conditions, vehicle mileage and standard of maintenance may also affect fuel consumption; therefore the results do not express or imply any guarantee of fuel consumption attainable.
